

Salvage edge with words

This is the layout guide for the Placement of the stencils. Some are turned over, this is only a guide, you may have different preferences. There is room to play too, the fit is not always perfect because of slight variations of petals and our efforts to keep the set fitting on two large stencils. If you can't watch the video on how to apply the stencils know this: start from the outside and work in. Petals that have petals overlapping them need to be marked first and then iron off the pattern from the overlapping stencils. The numbers indicate the order to transfer them for best results. It's fun, easy and you're going to end up with something fabulous! Enjoy the process.

R= reverse, flip the stencil over.
